office

# too . too 2.0

The office chair that fits in. Swivel and visitor chairs Design: E. Hansen, G. Reichert

# too and too 2.0: The chair for a modern work environment.

The office chair that fits in automatically: too conforms ergonomically to each user and – with its different variants – also to each function. too is available as a swivel chair with extra-broad upholstery on the back or as a transparent variant (too 2.0) with a mesh back. Visitor chairs complete the range.

Design: E. Hansen, G. Reichert

- ergonomic
- automatic weight adjustment
- available in different upholstered versions and with a mesh back
- with an elegant button-operated mechanism
- with several additional functions and options
- excellent price-performance ratio

### Areas of application

## office

too and too 2.0: Automatic, ergonomic, with a high seatcomfort. With models for every need – from visitor chairs to models for the executive suite.

too

# Comfort in good health: too's automatic ergonomics.

Just take a seat – too will take care of everything else: The counterpressure supporting the back automatically adjusts according to the user's weight and movement. Meanwhile, the front edge of the seat remains level, avoiding pressure on the back of the thighs and maintaining blood circulation. By adjusting the back and seat heights, too can be adjusted even more precisely to the user in a trice. What's more, the comfort really starts when handling the chair. An elegant button-operated mechanism controls the chair's many functions and settings, without any need for bothersome levers.

# High quality fixtures – already available in the standard version.

Exclusive extra: too and too 2.0 impress thanks to an excellent price-performance ratio, with even the base model offering high quality fixtures:

- Adjustable seat depth and height
- Lordosis support
- Adjustable back height
- Aluminium back support and base

There are also numerous optional extras, such as the smooth adjustable seat incline, additional air cushions for lordosis support, headrest with adjustable height and depth and rotating multifunctional arm-rests that are height, width and depth adjustable. All of this makes for healthy individualism in the office.

Whether adjustable headrests or back supports made from polished aluminium – too has firstclass all-round workmanship.

The ergonomic swivel chair with extra-wide upholstery on the back – and many optional extras.

One line – many versions: The right visitor chairs too are available in a cantilever design or as a 4-legged variant with a square section steel frame and a plastic back.

> Cantilever and four-legged chair with plastic back and a square section steel frame.

# Transparent versions for even greater comfort.

too 2.0 gets additional comfort and an entirely new visual impact thanks to a mesh back. The transparent back consists of a special knitted fabric – a manufacturing process which permits an especially precise fit and form-hugging design.

too 2.0: the extraordinary material creates comfort by moulding to the back, ensuring a healthy posture while simultaneously giving a pleasant, airy feel.

lordosis support.

The cantilever design provides additional possibilities – too 2.0 visitor chair with mesh back and round section steel frame. The same benefits are evident here – latest technology, sensitive functionality and an outstanding price-performance ratio.

The polyester fabric moulds to the sitter's back.

Also in the 2.0 series: the visitor chair with a mesh back and round section steel frame.

#### Туре М

Multifunctional arm-rest with plastic adapter. Functions operated using an integrated push button/level (height adjustment: outwards to each side, swing function: backwards).

# Notes

See the current pricelist for details, prices and terms of business. Technical changes, errors and colour variations excepted. Some of the models depicted are special, premium-cost designs. Wood is a natural product. For our furniture ranges, we use only high-quality beech from sustainable forestry sources. Despite the woods being carefully selected, there may be variations in colour. Variations in colour and pattern are not grounds for product returns but rather an expression of the unique character of wooden furniture.
